

— A FOUNDER'S NOTE · SEP 2026

I built an AI diagnosis engine. Then I used it on *my own startup.*

NyayaSetu AI × Ally

FOUNDER CLARITY REPORT · SEP 2026

I became *Ally's user.*

NYAYASETU AI × ALLY

Here's what Ally found when I ran
NyayaSetu AI through the diagnosis.

UNDERSTAND — DIAGNOSE — ROOT CAUSE — CLARITY — NEXT MOVE

- Compass
- Founder DNA
- Business DNA
- Clarity Report**
- Next Move
- Knowledge

Clarity Report

Founder Diagnosis · NyayaSetu AI · 30 answers · 15 dimensions · 6 pillars

SEP 2026 · PROVISIONAL READ

BUSINESS HEALTH

Needs Attention

Where you are today — not a verdict on whether this works.

ROOT CAUSE CONFIDENCE

Moderate

 unconfirmed

The next steps are what would settle it.

RED FLAG PILLARS

3

 of 6 pillars

Founder Readiness · Revenue Maturity · Strategic Clarity

BUSINESS DNA

six pillars · lowest first

Revenue Maturity 20%		Not started yet
Founder Readiness 25%		Needs Attention
Strategic Clarity 10%		Needs Attention
Team & Leadership 10%		Needs Attention
Market Clarity 20%		Needs Attention
Product & Execution 15%		Developing

ROOT CAUSE ANALYSIS

ranked by evidence

Building Is the Safe Place		
01	Founder Psychology · carried the heaviest risk of every dimension	PRIMARY
02	Lack of Data Showed up behind the finding above · worth watching	SUPPORTING
03	No System for Tracking Real Behavior Business Model Design · worth watching, not yet a conclusion	SUPPORTING
Ruled out: Product & Execution scored higher — not a capability gap.		

PRIORITISED NEXT ACTIONS

confirm first · two weeks

- ☒ **Write the problem you solve in one sentence**
Who has it, and what changes for them — before naming what you built. **NOW**
- ☐ **List your three strongest claims**
Beside each, the thing outside your own opinion that backs it. Mark the ones with nothing. **WEEK 1**
- ☐ **Explain the business out loud to a stranger**
Write down the exact moment they looked lost. **WEEK 1**

FOUNDER INSIGHT

Problem Solver archetype, driven by purpose. The last thing shipped was the NyayaSetu prototype. The biggest problem named: users. What's in the way looks like Building Is the Safe Place — not yet confirmed.

DIAGNOSIS · 30 / 30

HOW THE DIAGNOSIS WORKS

Not another *AI chat.*

From my context to one root cause, in five steps.
NyayaSetu AI as the worked example.

- **UNDERSTAND**

4 answers in my own words. Then 30 diagnosis answers.

- **DIAGNOSE**

15 dimensions, 6 pillars. Business Health: Needs Attention.

- **ROOT CAUSE**

Building Is the Safe Place. Moderate confidence, unconfirmed.

- **CLARITY**

Not a capability gap. Product & Execution scored higher.

- **NEXT MOVE**

Two weeks, one question to answer.

— NYAYASETU AI · IN PROGRESS

Diagnosis is done. *Now the real work begins.*

WHERE I AM

Prototype live on the website.

Early users through direct outreach and my own network.

Product & Execution ——— **Developing**

Business Health ——— **Needs Attention**

WHAT I WORK ON NEXT

- 01 Write the problem I solve in one plain sentence — who has it, what changes for them.
- 02 List my three strongest claims and what, outside my own opinion, backs each one.
- 03 Explain NyayaSetu out loud to someone who doesn't know it. Note where they get lost.

“Building a good product doesn’t automatically mean people will use it.”

— THE OPERATING LOOP

Now, *I build.*

DIAGNOSE

✓ Complete

30 answers. One root cause named, still to be confirmed.

UNDERSTAND

✓ Complete

Not a capability gap. The safe place is building.

BUILD

→ Continuing

Iterating the NyayaSetu prototype.

VALIDATE

→ Continuing

The number I watch: weekly users who come back.

SHIP

→ Continuing

Prototype is on the website. Next iteration follows.

LEARN

→ Continuing

A good product doesn't mean people will use it. Testing that.

INTRODUCING ALLY

Let's start the hustle *with Ally.*

THE FOUNDER'S COMPASS

Understand.

Diagnose.

Find the root cause.

Get clarity.

Know your next move.
